

Thank you for your email please except our apologies for the delay in responding.

I have noted your comments of support the proposed School Safe Environment Zone on Langstone Way.

In regards to your comments regarding Ashworth Road. Displacement comes with any introduction of restrictions. There are a number of carparks around this area which are not being used to full capacity and we would remind business that if there is onsite parking they should be asking visitors and staff that have to drive to use the relevant car park. If staff are not able to use the car parks as it is to full capacity they are to park in a safe appropriate manor away from junctions, accesses and turning heads as the highway code stipulates The proposed TRO for Ashworth Road is at the end of Ashworth Road near a delivery entrance and the access onto Ashworth road from the GWW. Plan attached for your information. These proposed restrictions are to assist in protecting the access and turning head from obstruction and poor visibility of moving traffic and pedestrians caused by parked vehicles.

Kind Regards

**Julie Furneval MIHE**
